

# Healthspan Direct Primary Care (DPC)

## DO/MD

La Belle, MO | Canton, MO | Future Growth in Palmyra, MO

---

If you're feeling rushed, overbooked, or like you're carrying the weight of care on your own... you're not alone.

Many physicians today are practicing in systems that prioritize volume over relationships, reimbursement over root causes, insurance algorithms over best practice, and reactive over prevention.

At Healthspan DPC, we've built something different.

We believe primary care should be accessible, affordable, and high-quality—not rushed, fragmented, or driven by volume.

---

### What makes us different?

Healthspan DPC is not a traditional clinic setting. It intentionally feels more like a coffee shop where our members gather.

- 1-hour new patient visits
- 30-minute follow-ups and acute visits
- Smaller, physician-directed patient panels
- No overbooking
- Direct patient communication (text, phone, telehealth)
- Time to think through cases—not just move to the next room

We also practice a collaborative, team-based model of care.

- You'll work closely with Dr. Neisen, NPs, PAs, RNs, and MAs
- Providers regularly collaborate on cases and care plans
- You're not practicing in isolation—there is shared insight and support
- The team works together to ensure patients receive thoughtful, well-rounded care

This is a model where both autonomy and collaboration exist—and where neither is sacrificed.

---

## **Our culture.**

Healthspan DPC is locally built and deeply rooted in the community.

Our patients aren't numbers—they're neighbors.

We're a small, collaborative team that values:

- Thoughtful care
- Clear communication
- A calm, supportive work environment
- Doing things the right way, even when it's different

We are growing intentionally and looking for the right people to grow with us.

---

## **A better work environment.**

This is a more intentional pace of medicine. You'll have the time to:

- Build meaningful, long-term relationships with patients
- Practice preventative and comprehensive care
- Work through complex conditions without feeling rushed
- Collaborate with a team that values thoughtful decision-making

We believe great care happens when physicians have both time and support.

---

## **Clinical responsibilities.**

This role includes a broad scope of hands-on primary care, supported by a collaborative and well-functioning team.

Responsibilities include:

- Managing acute and chronic conditions across a full-spectrum primary care panel
- Performing in-office procedures:
  - EKG interpretation
  - Suturing and staple placement/removal
  - Incision and drainage
  - Joint injections and other minor procedures
- Interpreting diagnostics and labs
- Participating in preventive care and chronic disease management
- Collaborating with NPs, PAs, RN, and MA staff on patient care and follow-up
- Triaging patient concerns (in-person, phone, and messaging)

- Supporting a smooth, patient-centered clinic flow

While the pace of care is more intentional, the work remains clinically engaging, hands-on, and comprehensive.

This role is ideal for a physician who enjoys both:

- Building relationships with patients
  - Staying active in procedural and day-to-day clinical care
- 

### **Who we're looking for.**

We're looking for a physician who:

- Values relationship-based, patient-centered care
- Enjoys collaborating with a team of providers and staff
- Is comfortable in a rural or small-community setting
- Wants to be part of building and shaping a growing model
- Is open to a different, more sustainable way of practicing medicine

Primary care experience is preferred, but mindset and approach are key.

---

### **Position details**

- Full-time Physician (MD/DO)
  - Based in Northeast Missouri with growth into Palmyra
  - Competitive compensation and benefits aligned with experience and patient panel
  - Flexible, supportive practice environment
- 

### **Let's build something meaningful**

We're not just hiring a position—we're growing a model of care that puts patients and providers first.

If that resonates with you, we'd love to connect. Reach out to Steph to learn more.
