

# Healthspan Direct Primary Care (DPC)

## FNP-BC, FNP-C / PA-C

La Belle, MO | Canton, MO

---

If you're feeling rushed, overbooked, and disconnected from why you went into medicine... you're not alone.

At Healthspan DPC, we've built something different.

We believe primary care should be accessible, affordable, and high-quality—not rushed, fragmented, or driven by volume. Our model allows providers to slow down, think, and build meaningful relationships with their patients.

---

### What makes us different?

Healthspan DPC is not a traditional clinic setting. It intentionally feels more like a coffee shop where our members gather.

- 1-hour new patient visits
- 30-60-minute follow-ups and acute visits
- Smaller, provider-directed patient panels
- No overbooking
- Direct patient communication (text, phone, telehealth)
- Time to think through cases—not just move to the next room

We also practice a collaborative, team-based model of care.

In many traditional settings, providers can feel isolated—working through complex cases without meaningful collaboration or support.

At Healthspan DPC, we approach care differently.

- Providers work closely together to discuss cases and share insight
- You're not alone in decision-making
- There's space for collaboration, second opinions, and thoughtful care planning
- The team works together to ensure patients get the care they truly need

When care is both intentional and collaborative, it leads to better outcomes—for patients and for providers.

---

### A better way to practice.

Healthspan DPC is a more intentional pace of medicine.

You'll have the time to:

- Build real relationships with your patients

- Practice preventative and proactive care
- Follow through on complex problems
- Go home without the weight of a rushed day

We've created an environment that supports both patient care and provider well-being.

---

### **Our culture.**

Healthspan DPC is locally built and deeply rooted in the community.

Our patients aren't numbers—they're neighbors.

We're a small, collaborative team that values:

- Thoughtful care
  - Clear communication
  - A calm, supportive work environment
  - Doing things the right way, even when it's different
- 

### **Clinical responsibilities**

While our model allows for a slower, more thoughtful pace of care, our providers remain actively involved in hands-on patient care and day-to-day clinic operations.

Responsibilities include:

- Performing basic in-office procedures (lab draws, injections, some procedures)
- Starting IVs
- Managing acute and chronic conditions across a broad primary care scope
- Triageing patient concerns (in-person, phone, and messaging)
- Participating in patient communication (calls, texts, telehealth)
- Dispensing medications
- Collaborating with a small team to keep clinic flow smooth and patient-centered

This role requires comfort with both clinical autonomy and team-based care, with a willingness to step in where needed to support patients and the clinic. It's "all hands on deck" for the member experience—we value the member experience above all us.

---

### **Who we're looking for.**

We're looking for someone who:

- Enjoys relationship-based, patient-centered care
- Values autonomy and ownership in their panel and patients
- Is comfortable in a rural healthcare setting
- Wants to be part of building something meaningful

Experience in primary care is preferred, but mindset and approach matter most.

---

### **Position details**

- Full-time Nurse Practitioner or Physician Assistant
  - Based in Canton, MO or La Belle, MO
  - Competitive compensation and benefits aligned with experience and panel size
  - Supportive team and flexible structure
- 

### **Let's build something meaningful**

We're not just hiring a position—we're growing a model of care that puts patients and providers first.

If that resonates with you, we'd love to connect. Reach out to Steph to learn more.
