FOR INDIVIDUALS
& FAMILIES

Healthcare that keeps you healthy.

Life doesn't stop for doctor visits.

Between work, school schedules, and everything else on your plate – getting care should not feel complicated or unpredictable.

Healthspan Direct Primary Care (DPC) makes healthcare simple, accessible, and close to home. With one straightforward monthly membership, you get real access to your provider without copays, deductibles, or surprise bills. It's healthcare you don't have to think twice about.

How it works:

Direct primary care is a membership-based model. Instead of paying per visit, you pay one predictable monthly fee that covers your primary care. That means:

- Same or next-day appointments
- Direct access to your provider by text, phone or email
- Comprehensive visits that aren't rushed
- No copays or surprise charges

Close to home. Focused on staying well.

Insurance is designed for emergencies, but most health issues can be managed or avoided when you have consistent access to primary care.

With Healthspan DPC, you can be seen quickly, access labs and prescriptions, connect by text or telehealth, and build a plan that supports your long-term health. When care is easy to access, small problems stay small and your health stays on track.

Transparent pricing. No surprises.

Plans as low as $80/person, plus discounts on family packages, medications and labs.

Enroll today to experience the benefits of patient-centered healthcare.

Unlimited access to a dedicated care team.
